Art Unit: 2635

1. The Office action is in response to the request for CPA filed October 27, MM with amendment and new references. Claims 1-45 are pending.

New rejections

2. NONE.
3. Claims 1-45 are allowed.
4. The following is an examiner's statement of reasons for allowance: The Examiner had previously indicated that the claims distinguished over the prior art because they recited a method and apparatus using passive transponders in a well environment. Such limitations were not known by the prior art of record at the time. The newly cited references (Kelly and Savage) teach the use of passive transponders located on a drill string. These references, however, do not anticipate or make obvious the previous claims or the newly added claims. Kelly and Savage teach the location of passive transponders on sections of drill pipe to determine when these sections have been added to the drill string and to determine the length of the drill string along with other parameters. The reader for such a system, however, is stationary and monitors the sections of pipe as it moves past the reader. The claims in the instant application recites a method and apparatus where the passive transponders are at fixed and known locations with the drill string and the reader is a tool that is moved within such an environment. The passive transponders permit the user to locate the position of the tool within a pipe with many sections. Thus, the function is entirely different from that shown in the cited references.
